

## CAFÉ ASTRONOMY 14th August 2021 At the Observatory

Angela Frimberger has invited you and your friends to join her at the observatory with Q & A follow.

**ABOUT THE SPEAKER:** Angela Frimberger, BS, VMD, Diplomate ACVIM (Oncology)

Angela is a parent, biologist, veterinary oncologist, small business owner and volunteer climate advocate / educator.

Locally, Angela is Chair & Treasurer of the Energy Forever community renewable energy project, Board member of the Port Macquarie Chamber of Commerce, and member of the Port Macquarie-Hastings Council Sustainability Advisory Subcommittee.

She also seeks to advance climate advocacy within the veterinary profession; and founded ClimateVets in 2016 and was a founding Board member of Veterinarians for Climate Action in 2019.

➤ **ABSTRACT OF THE SPEECH: Climate Change: Must we change? Can we change? Will we change?**

Climate change impacts many areas including inter-generational justice; biodiversity; health; business and economics; immigration and defence; moral and humanitarian questions.

Concerned citizens not only need to be aware of these impacts but should have an understanding of the science around climate change, and even more importantly, the potential solutions that are available and becoming more and more practical.

This session will provide the audience with the basics of why climate change is occurring and what we can do to mitigate it, and will focus on the questions 'Must we change?', 'Can we change?' and 'Will we change?'
